chemistry work has largely fallen on Dr Y's shoulders, as acknowledged by Dr Clemens. He is now practically on sole trained man in this line of work and as such has been ordered to attend the Pusa Agricultural conference as the representative of the Imperial Dept. It is, I believe, also under the consideration of Govt to depute him to other places to study & report on the agricultural conditions obtaining there in connection with the new Agricultural Dept to be formed here on the whole I think there are good grounds for increasing the pay & prospects of Dr Gopalan Nayar, & that it will not be too much to assimilate the same to those of the other Asst Chemists. If preferred, the increments might be given biennially instead of annually

The Statement made in Dr Lehmann's letter under disposal that there is a grade of Assistant Chemists on Rs 300-5-450 does not seem to be Correct. The two officers in the Dept of Agricultural Chemistry, who are drawing that rate of pay were originally Assistant Geologists and were accordingly given the pay allowed to that class of officers. It was definitely stated in G.O. of 11-1-05 that the higher rate of pay allowed to the two Assistant Geologists drafted into the Dept of Agricultural Chemistry would not be given to other officers of that Dept. The recommendation made in the letter under disposal is mainly based on the assumption that there is a grade of Assistant Chemists on Rs 300-5^{0}_{1}-450. That this assumption is not correct was pointed out even when Dr Lehmann's proposal regarding the advancement of Mr Yegna Narayana Iyer was made in 1905. From a perusal of the previous files re Mr. Yagnanarayana Iyer it is clear that the grade of Assistant Chemists should in all respects be regarded as analogous to that of Assistant &&de Geologists.

× Flag W. (Cinder File)

In September 1900 on Dr. Lehmann's request for two probationers for employment as Assistant Chemists, Government transferred two Assistant Geologists for the work with the stipulation that they should, if necessary, be devoted to the work of the Geological Department. [illegible]

Flag V

Flag A

Mr. Yagnanarayana Iyer was appointed in January 1901. It is seen from the papers relating to the appointment that the question of his designation and of his status relative to the men transferred from the Geological Department were discussed at the time and that Dr. Lehmann expressed the opinion that Mr. Yagnanarayana Iyer should be styled Probationary Assistant Chemist, that his work was of the same nature as that of the other Assistants (i.e., the men from the Geological Department), and that so far as preliminary qualifications went Mr. Yagnanarayana Iyer had a much higher collegiate standing than the other Assistant Chemists, as according to Dr. Wilson, Professor of Chemistry, Madras Presidency College, he was the only M.A., in Chemistry of the Madras

GPB—50,000—18-5 06

Serial No.

University,—the highest degree in Chemistry procurable in India". He therefore strongly recommended that on passing through the period of probation Mr. Yagnanarayana Iyer should be given the position and standing of third grade Assistant Chemists. In a Council Resolution dated 6th April 1901 and in Government order No.8006-7/R.F.12 of 1900 dated 8th April 1901 issued thereon, it was laid down that Mr. Yagnanarayana Iyer should be styled "Probationary Assistant Chemist" and should rise to the grade of Assistant Chemist if found fit for confirmation.

× Flag U

It may be observed here that the grade of Assistant Chemist referred to in Dr. Lehmann's letters and in the Council Resolution cannot have been anything but a grade in all respects analogous to the grade of Assistant Geologists.

In the matter of travelling allowances &c Mr. Yagnanarayana Iyer was treated in the same way as recruits for the grade of Assistant Geologists.

× Flag B1

In July 1903 Dr. Lehmann recommended Mr. Yagnanarayana Iyer for an increment of 25 Rs.

× Flag B2

In his note of 18th August 1903 the then Secretary Mr. H.V. Nanjundayya raised the question whether Mr. Yagnanarayana Iyer should not be given an increment of 50 Rs after one year in the same manner as Apprentice Geologists and confirmed at the end of two years. He suggested that Dr. Lehmann should be asked whether Mr.

GPB—50,000—13-5 08

Serial No.

Yagnanarayana Iyer was fit for confirmation. The enquiry was not however made as the Dewan (Sir P.N. Krishna Murti) thought that "apparently Mr. Yagnanarayana Iyer had agreed to the recommendation made by Dr. Lehmann" and that "Government should not force more upon him".

The question was thus shelved and the recommendation made by Dr. Lehmann was accepted at the time.

× Flag A

In 1905 when the question of his confirmation came up for consideration Dr. Lehmann recommended that he should be treated in the same way as the Assistant Geologists. Both the Councillors (Mr. C. Srinivasiengar and Mr. C. Madiah) thought that Mr. Yagnanarayana Iyer should be treated in the same way as the Assistant Geologists, but the Dewan (Sir P.N. Krishna Murti) thought that a scale of 150-300 Rs was sufficient. Mr. C. Srinivasiengar agreed to this proposal in the circumstances of the case and this was sanctioned.

In October 1905 Dr. Lehmann made a further representation on the above order urging that Mr. Yagnanarayana Iyer should be treated in the same way as the Assistant Geologists, In the result however Government only sanctioned an advance of 2 increments.

Flag T (Cuttack file)

× Flag E (— do —)

From the Dewan's note in December 1905 × 27th Feb it is seen that the differential treatment was based on the ground that Messrs Jayaram and Slater (Assistant Geologists) who had gone to England and specially qualified themselves in Geology should be

NOTE—Contn. sheet.

GPB—50,000—18-5 08

Serial No.

given suitable pay, that as Messrs Venkata Row and Krishnayya (working as Assistant Chemists) were originally Assistant Geologists they ought not to be treated differently from the other Assistant Geologists and that the same grounds did not apply in the case of Mr. Yagnanarayana Iyer.

It may however be observed that Mr. Sampat Iyengar M.A., Assistant Geologist who was entertained as Apprentice Geologist in December 1901 (nearly a year after Mr. Yagnanarayana Iyer) has been hitherto treated in the same manner as the Assistant Geologists recruited in 1895 and I believe that he will in due course be promoted to 300 Rs and 300 to 450 Rs like the other Assistant Geologists.

So far as work and qualifications go Mr. Yagnanarayana Iyer and Mr. Sampat Iyengar are both M. A's of the Madras University in their respective subjects and Mr. Yagnanarayana Iyer has proved himself as good in his line as Mr. Sampat Iyengar in his. The special reasons which were held to differentiate Mr. Yagnanarayana Iyer's case from that of the other Assistant Chemists, apply to the same extent to distinguish the case of Mr. Sampat Iyengar from that of the other Assistant Geologists, but since they have not been applied in the case of Mr. Sampat Iyengar, there is no reason why they should be applied in the case of Mr. Yagnanarayana Iyer alone.

Compared with the other Assistant Chemists

Note—Contn. sheet.

GPB—50,000—13.5.08

Serial No.

Mr. Yagnanarayana Iyer has been all along doing the chief part of the Agricultural Chemical work in the laboratory and was of great help to Dr. Lehmann by relieving him of all laboratory work and leaving him free to arrange outdoor experiments. The work of organic analysis is well known to be more complicated and difficult than the analysis of inorganic rocks and minerals. Even now Mr. Yagnanarayana Iyer is one of the four M.A's in Chemistry of the Madras University.

The above facts will show that it was originally intended to treat the Assistant Chemists in the same way as Assistant Geologists though for some reasons (which, I would venture to submit with the great deference, cannot be said to be very adequate and which have not been consistently applied to other similar cases). this intention was deviated from in 1905.

Mr. Yagnanarayana Iyer has strong claims for a more liberal treatment than has been accorded to him and it will be only fair to him to rank him with Assistant Geologists and render his prospects as good as theirs.

So far as the future organization of the Agricultural Department is concerned it will in any case be necessary to have trained men for analytical work and we cannot easily replace a man of Mr. Yagnanarayana Iyer's qualifications and special training.

NOTE—Contn. sheet.

GPB—50,000—13-5 08

Serial No.

I understand that Mr. Yagnanarayana Iyer is prepared to go to America or elsewhere to study practical agriculture or agricultural chemistry so as to be completely fitted to take charge of any work in connection with agriculture. He has had ample training in agricultural chemistry and it would be a good thing to get him trained in practical agriculture in one of the American Universities for a year or two. If this is done we shall have an Indian officer of the State with European qualifications fit to take charge of the Agricultural Department in Mysore who may be expected to improve the industry in the State considerably.

If this suggestion is received favourably Mr. Yagnanarayana Iyer's pay may be increased to Rs. 300 now and he may be sent to America with a suitable scholarship to study practical agriculture or agricultural chemistry.

Paper under disposal

In his letter dated 12th January 1909 Dr. Coleman has raised the question of the pay and prospects of Mr. A.K. Yegna Narayana Iyer M.A., Agricultural Assistant Chemist. He points out that the position given to this officer is not nearly as good as what he had a right to expect from the terms of his original appointment, or what has been given to the Assistant Chemists of the Geological Department working in the same laboratory, and he therefore recommends that as in their case Mr. Yegna Narayana Iyer's pay may also be raised to Rs.300-50-450.

The Financial Branch says that there is no grade of Assistant Chemists on Rs.300-50-450 and that the Assistant Chemists of the Geological Department are drawing that pay as they were originally Assistan Geologists; and suggests that the question may lie over until the question of constituting an Agricultural Department is settled.

The facts of the case are clearly explained in the officiating Secretary's note of the 23rd

February 1909, and as pointed out by him, when in 1901 Dr. Lehmann recommended, and Government ordered, that Mr. Yegna Narayana Iyer should be styled Probationary Assistant Chemist during the period of his probation and "should rise to the grade of Assistant Chemist if found fit for confirmation", the grade of Assistant Chemists referred to could not have been anything but a grade in all respects analogous to the grade of Assistant Geologists.

Dr. Lehmann has always spoken very highly about Mr. Yegna Narayana Iyer's abilities. When Mr. Yegna was appointed in 1901, Dr. Lehmann said that so far as preliminary qualifications went "Mr. Yegna Narayana Iyer had a much higher collegiate standing than the other Assistant Chemists, as according to Dr. Wilson, Professor of Chemistry, Madras Presidency College, he was the only M.A. in Chemistry of the Madras University, the highest degree in Chemistry procurable in India".

He worked under Dr. Lehmann for nearly 8 years and was the only Assistant Chemist who attended to the work of Agricultural Analysis. When he left Dr. Lehmann handed over charge of his office and laboratory to Dr. Coleman but as Dr. Coleman himself says, the supervision of "the work of the agricultural

chemical laboratory" has largely fallen on Mr. A.K. Yegna Narayana Iyer. Latterly as it was found necessary to relieve Dr. Coleman, who is not a specialist in Agricultural Chemistry, of the charge of the Agricultural Chemist's laboratory, so as to set him free to devote his whole time to his legitimate duties as Entomologist and Mycologist, orders have been passed directing that "Mr. A.K. Yegna Narayana Iyer, Assistant Chemist, who was Dr. Lehmann's principal Assistant in the Laboratory work pertaining to Agricultural Chemistry, will be placed in charge of the Agricultural Chemist's Laboratory, the Hebbal Farm &c., pending further orders." Mr. Yegna Narayana Iyer's work and responsibility have thus greatly increased and I am of opinion that he may be given a pay of Rs.300 now. His present pay is Rs.250. Both the Councillors are also of opinion that this increase of pay may be given. This may be sanctioned.

H.D (Links file)

Mr. Yegna Narayana Iyer has even now some considerable knowledge of practical agriculture and he would make a valuable head of the Agricultural Department if he could get a training in America or England. I would therefore also propose that he may be sent

to either of these countries with a Damoder Dass scholarship.

4303 Rev

From

Leslie C. Coleman, Esq., M.A., Ph.D.,
Mycologist & Entomologist in charge of
the Agricultural Chemist's office, Bangalore,

To

The Secretary to the Government of .
His Highness the Maharaja of Mysore,
Genl. & Rev. Departments, Bangalore.

Dear Sir,

Will you kindly bring to Government's attention the following points in connection with the appointment of Mr. A.K. Yegnanarayana Iyer, Assistant Chemist in the Agricultural Chemist's office ? Mr. A.K. Yegnanarayana Iyer was appointed on 3rd January 1901 as Analyst under the Agricultural Chemist. On Dr. Lehmann's recommendation Government in its Order No. 8006-7/ R.F. 12-1900 dated 8th April 1901 gave him the title of Probationary Assistant Chemist and further states that"he will rise to the grade of Assistant Chemist if found fit for confirmation as such".

The grade of Assistant Chemist was at that time Rs.200 per mensem rising by increments of Rs. 50/- to Rs. 300/-. Notwithstanding this fact and notwithstanding Dr. Lehmann in his letter No.678 of the 23rd February 1904 requested that he be appointed Assistant Chemist on the same basis as the other two Assistant Chemists; Mr. B. Venkata Rao and Mr. H,V. Krishnayya, Government in its Order No. R. 10660-1/E.R. 98-04-3 dated 29th April 1905 confirmed Mr. Yegnanarayana Iyer but on a salary of only Rs. 150/- rising to Rs. 300/- by annual increments of Rs. 20/- with a last in-

increment of Rs. 10/-.

Dr. Lehmann in his letter No. 785 of the 3rd of May 1905 protested strongly against this treatment of Mr. Yegnanarayana Iyer after he had been promised by Government a position on the same basis of pay as the other Assistant Chemists. He noted further that as the grade of Assistant Chemists had been materially improved (both Mr. Venkata Rao and Mr. Krishnayya had been given a further increase from Rs. 300/- to Rs. 450/- by annual increments of Rs. 50/- per mensem) Mr. Yegnanarayana Iyer's position should be really included in that increase. Later finding his protest of no avail Dr. Lehmann in his letter No. 836 of the 25th May 1905 recommended three year's increment from July 1st 1905 or a salary of Rs. 210/- per mensem. Instead Government in its Order No. 4315-6/Agri98-04-6 of the 3rd of October 1905 increased his pay to Rs. 190/- per mensem, the other increments to accrue as provided for in the former Order.

From these facts it is quite clear that a decided injustice has been done Mr. Yegnanarayana Iyer. This injustice is all the more apparent under present conditions. Since the departure of Dr. Lehmann considerably more work and responsibility had of necessity to fall on him. Under present conditions he together with the two Probationary Assistant Chemists has to do all the agricultural chemical work as the other two Assistants are kept busy with work for the Geological Department. Thus he must largely supervise the work of the agricultural chemical laboratory. In view of all these facts I beg leave to request that Government will kindly place Mr. Yegnanarayana Iyer on the same footings as regards increments to his salary as that of the other two Assistant Chemists, that is, that his pay be raised to Rs.300 per mensem rising by annual increments of Rs. 50/- per mensem to Rs. 450/-.

I have the honor to be, Sir,
Your most obedient servant,

Leslie C. Coleman
Mycologist & Entomologist
